TECH
TO IMPROVE
LIVES

Girls in middle school (typically age 10 to 14) will become scientists and engineers for a day. The workshops will include experiments with imaging, virtual reality, sensors, bioengineering, or robotics.

Parents can attend a concurrent program with a mix of hands on experiences that can be duplicated at home and discover the that awaits their future daughters in Science, Technology, Engineering and Math (STEM). The parents will program conclude with a visit to the classrooms to see what the kids have learned.

SHARE IDEAS
AND BUILD
PROJECTS
THAT
IMPROVE THE
LIVES OF
YOUR FAMILY
AND FRIENDS

Event supported by women and men in STEM professions from the following organizations
