

New Meeting Event!

Thursday, October 20, 2011, 11:30 am – 1:00 pm

**Tour of Aurora Casting & Engineering, Inc.; Santa Paula, CA
Manufacturer of Aluminum and Steel Castings
for the Aerospace and High-End Commercial and Industrial Markets**

Aurora Casting & Engineering, Inc. (www.auroracasting.com) is a small woman-owned business enterprise that has been producing aluminum and steel castings since 1980. It has grown steadily to become an industry leader as a result of careful attention to detail at each step of the manufacturing process. Specializing in small to medium investment castings with varying complexities, Aurora has a proven delivery record, can produce end-item machined parts, and also provide prototype castings through the sterolithography process. Aurora has built a reputation for quality in the production of aluminum and steel investment castings. The constant effort to improve service to customers has recently emphasized:

- Rapid prototyping and manufacturing for both aluminum and steel.
- In-house heat treating and machining.
- Bar-coded tracking system linked with real-time production control system.
- EDI and Internet capabilities.
- Cooperation with certified 3rd party facilities for non-destructive testing, plating and painting.
