IEEE WordPress Plugins and Widgets

Maintained by Ed Perkins; rev 1/28/2014 10:45 PM

IEEE has provided a set of 110 WordPress Plugins for use with the IEEE Template sites. These need to be activated to be used on a site. Several additional plugins are preactivated; these are noted in the document.

This list is as of **28-Jan-2014** with brief description and link to their WordPress page.

"Preactivated" plugins:
- Akismet – anti spam comment screening
- Aksimet Wedge
- Email Address Encoder – protect email addresses from email-harvesting robots by encoding them into decimal and hexadecimal entities
- Google Sitemap Generator (aka XML Sitemaps) – XML sitemap to help search engines index your site
- Semisecure Login – encrypts login passwords

Removed plugins (as of 21-Nov-2013 update):
- Alex Set Favicon [replaced by IEEE Set Favicon]
- Blog Copier
- Smart Youtube PRO
- User Locker
- WP Bannerize

Preferred plugins:
- Tiny MCE Advanced (useful editor options)
- All-in-One Event Calendar by Timely
- Better WordPress reCAPTCHA (works with Akismet) or Captcha [deter SPAM/hackers]
- Custom CSS Manager
- Gravity Forms (forms)
- IEEE Set Favicon (site icon)
- Meta Slider (for slideshows)
- NextGEN Gallery (for photos)
- WP User Avatar

New / upgraded plugins:
- Advanced iFrame Pro (upgrade)
- Yet Another Related Posts Plugin (YARPP)
- WP User Avatar
- WP SlimStat ShortCodes
- WP Google Maps, WP Google Maps - Gold Add-on, WP Google Maps - Pro Add-on
- TablePress [NEW, replaces WP-Table Reloaded]
- TablePress Extension: Row Filtering
- Syndicate Press
- Posts in Page
- PluginHogDetector (admin)
- Meta Slider

IEEE WordPress Plugins and Widgets

Maintained by Ed Perkins; rev 1/28/2014 10:45 PM

- Gravity Forms
- IEEE Set Favicon
- IEEE SSO sign in
- Cyclone Slider 2

Redundant or obsoleted plugins:
Forms:
- WP-Table Reloaded [replaced by TablePress]
- Contact Form 7 [suggest use Gravity Forms]
Calendar:
- Ajax Event Calendar [suggest use All-in-One calendar]
- Calendar [suggest use All-in-One calendar]
Avatar:
- Avatars (BBPress) [suggest use WP User Avatar for new uses]
Sliders:
- Cyclone Slider 2 [suggest use Meta Slider]
- Easing Slider "Lite" [suggest use Meta Slider]
- Genesis Responsive Slider [suggest use Meta Slider]
- WP Coda Slider [suggest use Meta Slider]
Polls:
- Polldaddy Polls & Ratings [suggest use vTools Surveys instead]

Plugins being considered for removal and not recommended for use in new sites, either due to lack of support, redundancy with new WordPress features/plugins or lack of use:
- 404 Notifier
- Any Mobile Theme Switcher
- Bad Behavior
- Collapse-O-Matic
- Configurable Tag Cloud
- Genesis Simple Sidebars
- Media Tags
- MindValley Include Content
- Photonic Gallery for Flickr, Picasa, SmugMug, 500px, Zenfolio and Instagram
- Twitter Goodies
- Twitter Widget Pro
- Use Google Libraries
- WP-RSSImport

IEEE WordPress Plugins and Widgets

Maintained by Ed Perkins; rev 1/28/2014 10:45 PM

Complete Plugin List as 28-Jan-2013

404 Notifier (broken links) [may be removed]
This tracks broken links on the site.
This plugin will log 404 hits on your site and can notify you via e-mail or you can subscribe to the generated RSS feed of 404 events.
http://wordpress.org/extend/plugins/404-notifier/
http://alexking.org/projects/
Version 1.3 | By Alex King | Visit plugin site

AdRotate
The very best and most convenient way to publish your ads.
AdRotate is the popular ad management plugin for Wordpress 3 and newer.
Create and manage unlimited ads. Keep stats and run successful advertisement campaigns straight from your dashboard. If you are a Wordpress user you should use AdRotate to get the most out of your advertisements and have the best and greatest flexibility in ad placement and management.
Add and manage the ads from the dashboard and show a random banner, or multiple, on your site. The plugin supports unlimited groups for banners allowing to tie certain banners to different areas of the website. Easy management from the dashboard allows you to quickly oversee, add and edit banner code or renew/delete and add new ads. Previewing of banners when editing them. And even some statistical values. Receive a periodic email when banners are (about to) expire(d) informing you to take action.

http://www.adrotateplugin.com/
Version 3.9.3 | By Arnan de Gans of AJdG Solutions | Visit plugin site

Advanced iFrame Pro [upgraded]
This plugin includes any webpage as shortcode in an advanced iframe. By entering the shortcode '[advanced_iframe secuitykey=""]' you can include any webpage to any page or article.
Pro features:
- Show only specific areas of the iframe even when the iframe is on different domain
- Graphical content selector: http://examples.tinywebgallery.com/configurator/advanced-iframe-area-selector.html
- External workaround supports iframe modifications
- Widget support
- No view limit
- Hide areas of an iframe
- Browser detection
- Change link targets
- Url forward parameter mapping.
- And much more...

Version 5.3 | By Michael Dempfle | Visit plugin site

IEEE WordPress Plugins and Widgets

Maintained by Ed Perkins; rev 1/28/2014 10:45 PM

Ajax Event Calendar [suggest use All-in-One calendar]
An easy-to-use visual community calendar that allows authorized users to add, edit, move, copy, resize, delete and filter events into customizable categories - supports daily, weekly, monthly and yearly repeating events. Calendars can be added to your site by typing "[calendar]" shortcode in the body of a page, a post or a text widget. Event lists are similarly added via the "[eventlist]" shortcode. Both shortcodes are highly customizable with numerous display options.
http://wordpress.org/extend/plugins/ajax-event-calendar/
Version 1.0.4 | By Eran Miller | Visit plugin site

Akismet [pre-installed]
Akismet checks your comments against the Akismet web service to see if they look like spam or not and lets you review the spam it catches under your blog's "Comments" admin screen. The Akismet Wedge for MU Plugin wedges between MU Blogs and Akismet providing the Akismet key and other data. MU blogs will be able to use the Akismet API key without having to configure each blog or edit any PHP files.
http://wordpress.org/extend/plugins/akismet/
Version 2.5.9 | By Wordpress | Visit plugin site

Akismet Wedge Plugin for MU [pre-installed]
Globalizes the akismet api key so it can be used across blogs on multi-site
http://wordpress.org/plugins/akismet-wedge-for-mu-plugin/
Version 0.9 | By Keith P. Graham | Visit plugin site

Alex Set Favicon [removed; replaced by IEEE Set Favicon]
Alex Set Favicon allows any user to easily set and update their favicon.
http://wordpress.org/extend/plugins/set-favicon/
http://anthony.strangebutfunny.net/my-plugins/alex-set-favicon/
Version 8.0 | By Alex and Anthony Zbierajewski | Visit plugin site

All-in-One Event Calendar by Timely
A calendar system with month, week, day, agenda views, upcoming events widget, color-coded categories, recurrence, and import/export of .ics feeds.
http://wordpress.org/extend/plugins/all-in-one-event-calendar/
http://time.ly/
Version 1.10.9-standard | By Timely | Visit plugin site

Any Mobile Theme Switcher [may be removed]
This plugin allows you to detect all mobile platforms and switch the theme. Supports most of the mobile platforms including iphone, ipad, ipod, windows mobile, palm os, blackberry, android. You can select a different mobile theme for each mobile browser.
http://wordpress.org/extend/plugins/any-mobile-theme-switcher/
http://dineshkarki.com.np/any-mobile-theme-switcher
Version 1.4 | By Dinesh Karki | Visit plugin site | Get Support

AutoBlog
An automatic blog feed reading plugin. This plugin automatically posts content from RSS feeds to different blogs on your WordPress Multisite network, it's like feedpress or wp-o-matic, except that it actually works, brilliantly and simply! Added settings for each feed to determine the order of processing

images to set featured image. Added settings for each feed to set the minimum width and height for a featured image. Added a debug image import add-on to send an image import report to a specified email address for each feed.
http://premium.wpmudev.org/project/autoblog
Version 3.9.9.8 | By Barry (Incsub) | Visit plugin site

Avatars (BBPress) [suggest use WP User Avatar for new uses]
Allows users to upload 'user avatars' and 'blog avatars' which then can appear in comments and blog / user listings around the site. Just go to **Users > Your Profile** to upload your '**User Avatar**'; and go to **Settings > Blog Avatar** to upload your 'blog avatar'.
http://premium.wpmudev.org/project/avatars
Version 3.5.3 | By Andrew Billits, Ulrich Sossou (Incsub) | Visit plugin site

Bad Behavior [may be removed]
Deny automated spambots access to your PHP-based Web site.
Bad Behavior is one of the Internet's most trusted solutions for helping to prevent link spam and other malicious activity, from well-known sites to the smallest blogs. Bad Behavior complements other link spam solutions by acting as a gatekeeper, preventing spammers from ever delivering their junk, and in many cases, from ever reading your site in the first place.
http://wordpress.org/extend/plugins/bad-behavior/
http://bad-behavior.ioerror.us/
Version 2.2.15 | By Michael Hampton | Visit plugin site

Better WordPress reCAPTCHA
This plugin utilizes reCAPTCHA (with support for Akismet) to help your blog stay clear of spams. This plugin, however, has a different approach from the current WP-reCAPTCHA plugin and allows you to customize how the captcha looks using CSS.
http://wordpress.org/extend/plugins/bwp-recaptcha/
http://betterwp.net/wordpress-plugins/bwp-recaptcha/
Version 1.1.0 | By Khang Minh | Visit plugin site

Blog Copier [removed]
Enables superusers to copy existing sub blogs to new sub blogs.
http://wordpress.org/extend/plugins/blog-copier/
Version 1.0.2 | By Modern Tribe, Inc. | Visit plugin site

Blubrry PowerPress
Blubrry PowerPress adds podcasting support to your blog. Features include: media player, 3rd party statistics, iTunes integration, Blubrry Services (Media Statistics and Hosting) integration and a lot more.
http://wordpress.org/extend/plugins/powerpress/
http://create.blubrry.com/resources/powerpress/
Version 5.0.3 | By Blubrry | Visit plugin site

Broken Link Checker
Checks your blog for broken links and missing images and notifies you on the dashboard if any are found.
http://wordpress.org/extend/plugins/broken-link-checker/

IEEE WordPress Plugins and Widgets

Maintained by Ed Perkins; rev 1/28/2014 10:45 PM

http://w-shadow.com/blog/2007/08/05/broken-link-checker-for-wordpress/
Version 1.9.2 | By Janis Elsts | Visit plugin site

Calendar [suggest use All-in-One calendar]
This plugin allows you to display a calendar of all your events and appointments as a page on your site.
http://wordpress.org/extend/plugins/calendar/
http://www.kieranoshea.com/
Version 1.3.3 | By Kieran O'Shea | Visit plugin site

Captcha
Plugin Captcha intended to prove that the visitor is a human being and not a spam robot. Plugin asks the visitor to answer a math question.
http://wordpress.org/extend/plugins/captcha/
http://bestwebsoft.com/plugin/
Version 3.9.4 | By BestWebSoft | Visit plugin site

Collapse-O-Matic [may be removed]
Collapse-O-Matic adds an [expand] shortcode that wraps content into a lovely, jQuery collapsible div.
Collapse-O-Matic adds an `[expand title="trigger text"]hidden content[/expand]` shortcode that will wrap any content, including other shortcodes, into a lovely jQuery expanding and collapsing div. A complete listing of shortcode options and attribute demos are available, as well as free community and premium support.
http://wordpress.org/extend/plugins/jquery-collapse-o-matic/
http://plugins.twinpictures.de/plugins/collapse-o-matic/
Version 1.5.7 | By twinpictures, baden03 | Visit plugin site

Configurable Tag Cloud [may be removed]
A tag cloud plugin for WordPress to give you more flexibility with the styling of your tag cloud.
http://wordpress.org/extend/plugins/configurable-tag-cloud-widget/
http://reciprocity.be/ctc/
Version 5.2 | By Keith Solomon | Visit plugin site

Contact Form 7 [suggest use Gravity Forms for new users] [now activated per site]
See Contact menu item in Admin Dashboard to configure.
Contact Form 7 can manage multiple contact forms, plus you can customize the form and the mail contents flexibly with simple markup. The form supports Ajax-powered submitting, CAPTCHA, Akismet spam filtering and so on.
http://wordpress.org/extend/plugins/contact-form-7/
Version 3.6 | By takayukister | Site: http://contactform7.com/

> **Contact Form 7 Datepicker**
> Implements a new [date] tag in Contact Form 7 that adds a date field to a form. When clicking the field a calendar pops up enabling your site visitors to easily select any date. Now you can use the [datepicker] shortcode outside of CF7.
> http://wordpress.org/extend/plugins/contact-form-7-datepicker/
> https://github.com/relu/contact-form-7-datepicker/

Cyclone Slider 2 [NEW; suggest use Meta Slider]
Create and manage sliders with ease. Built for both casual users and developers. Cyclone Slider 2 is an easy-to-use slider plugin with an intuitive user interface. It leverages the built-in features of WordPress. It uses custom post for the slider, custom fields to store settings, and media uploader for the images. It

also uses a template system that allows developers to easily customize the look and behavior of the slider. It's a simple and flexible slider plugin.
http://wordpress.org/plugins/cyclone-slider-2/
http://www.codefleet.net/cyclone-slider-pro/
Version 2.8.2 | By Nico Amarilla | Visit plugin site

Deregister Contact Form 7 scripts and styles
Prevents the scripts and styling from the Contact Form 7 plugin from loading on your site. Useful for situations in which you do not require the AJAX functionality of the original plugin and have included all the necessary styling in your themes CSS.
http://wordpress.org/extend/plugins/deregister-contact-form-7/

Version 2.4.1 | By Enrico Battocchi | Visit plugin site

Dynamic Widgets
Dynamic Widgets gives you full control on which pages your widgets will appear. It lets you dynamically show or hide widgets on WordPress pages by setting conditional logic rules with just a few mouse clicks. No knowledge of PHP required. No fiddling around with conditional tags.
http://wordpress.org/extend/plugins/dynamic-widgets/
http://www.qurl.nl/dynamic-widgets/
Version 1.5.4 | By Qurl | Visit plugin site

Easing Slider "Lite" [suggest use Meta Slider]
Easing Slider "Lite" is an easy to use slideshow plugin. Simple and lightweight, built with native WordPress functionality. Throughly tested on iPhone, iPad and multiple Android devices, Easing Slider "Lite" is the perfect solution for mobile slideshows. We've used CSS3 transitions to ensure ultra smooth transitions on all devices. We've also integrated the new WordPress Media Library workflow to provide a better media management experience. Bulk uploading images to your slideshow is now easy, requiring just a few clicks. *Uses revised shortcode '[easingsliderlite]' in posts.* See http://cl.ly/1V0V411I1V09 for info on changes from v1.2.1.
Note: I've upgraded from v1.x and my slides have disappeared.
Don't sweat! Simply navigate to the **"Edit Slideshow"** admin panel and click the **"Import my Easing Slider v1.x settings"** button.
http://wordpress.org/extend/plugins/easing-slider/
http://easingslider.com/
Version 2.1.3 | By Matthew Ruddy | Visit plugin site

Email Address Encoder [pre-installed]
A lightweight plugin to protect email addresses from email-harvesting robots by encoding them into decimal and hexadecimal entities.
http://wordpress.org/extend/plugins/email-address-encoder/

Maintained by Ed Perkins; rev 1/28/2014 10:45 PM

Version 1.0.4 | By [Till Krüss](#) | [Visit plugin site](#)

Exclude Pages from Navigation
This lets you have pages that are not accessible by the navigation menus.
Provides a checkbox on the editing page which you can check to exclude pages from the primary navigation. IMPORTANT NOTE: This will remove the pages from any "consumer" side page listings, which may not be limited to your page navigation listings.
http://wordpress.org/extend/plugins/exclude-pages/
Version 1.92 | By [Simon Wheatley](#) | [Visit plugin site](#)

Facebook Members
Facebook Members is a WordPres Social Plugin that enables Facebook Page owners to attract and gain Likes from their own website. It uses Like Box. V5 major upgrade.
http://wordpress.org/extend/plugins/facebook-members/
http://crunchify.com/facebook-members/
Version 5.0.7 | By [Crunchify](#) | [Visit plugin site](#)

Genesis Responsive Slider [suggest use Meta Slider]
A responsive featured slider for the Genesis Framework.
This plugin allows you to create a simple responsive slider that displays the featured image, along with the title and excerpt from each post.
It includes options for the maximum dimensions of your slideshow, allows you to choose to display posts or pages, what category to pull from, and even the specific post IDs of the posts you want to display. It includes next/previous arrows and a pager along with the option to turn both on or off. Finally, you can place the slider into a widget area.
http://wordpress.org/extend/plugins/genesis-responsive-slider/
http://www.studiopress.com/
Version 0.9.2 | By [StudioPress](#) | [Visit plugin site](#)

Genesis Simple Sidebars [may be removed]
Genesis Simple Sidebars allows you to easily create and use new sidebar widget areas.
This plugin allows you to create multiple, dynamic widget areas, and assign those widget areas to sidebar locations within the Genesis Theme Framework on a per post, per page, or per tag/category archive basis.
Creating widget areas programmatically, then using conditional logic to properly assign them to sidebar locations can be a complex task for a beginner. This plugin allows you to do all this from a simple administration menu, and assign widget areas to sidebar locations with simple drop-down menus within the post/page edit screens, or when editing a tag or category.
http://wordpress.org/extend/plugins/genesis-simple-sidebars/
http://www.studiopress.com/plugins/simple-sidebars
Version 2.0.1 | By [Nathan Rice](#) | [Visit plugin site](#)

Global Content Blocks
Create your own shortcodes to add HTML, PHP, forms, opt-ins, iframes, Adsense, code snippets, reusable objects, etc, to posts and pages. Ideal for adding reusable objects to your content or to preserve formatting of code that normally gets stripped out or reformatted by the editor.

IEEE WordPress Plugins and Widgets

Maintained by Ed Perkins; rev 1/28/2014 10:45 PM

You can insert them directly using shortcodes or via a button in the TinyMCE visual editor toolbar. You can also insert the entire content of the Content Block instead of the shortcode or use other shortcodes within the Content Block. You can also modify the output of the Content Block via a hook.
It is ideal for inserting reusable objects into your content or to prevent the WordPress editor from stripping out your code or otherwise changing your formatting. The shortcodes are masked as images to allow easy manipulation and non-html tags contamination.
http://wordpress.org/extend/plugins/global-content-blocks/

NextGEN Gallery by Photocrati
A NextGENeration Photo Gallery for WordPress
NextGEN Gallery is a full integrated Image Gallery plugin for WordPress with a slideshow option. Before I started writing the plugin I studied all the existing image and gallery plugins for WordPress. Some of them are really good and well designed, but the gap I filled was a simple administration system at the back end which can also handle multiple galleries. Use tags on the post/page, eg: '[nggallery id=x]' or '[slideshow id=x]'. NOTE: does NOT use the Media Library – must upload images separately.
http://wordpress.org/extend/plugins/nextgen-gallery/
http://www.nextgen-gallery.com/
Version 2.0.40 | By Alex Rabe | Visit plugin site | Overview | Get help | Contribute | Donate

NextGEN Public Uploader
NextGEN Public Uploader is an extension to NextGEN Gallery which allows frontend image uploads for your users. Upon upload the submitted image is marked as "excluded" and an email notification will be

sent letting you know an image is waiting to be reviewed. Requires NextGEN installation.
http://wordpress.org/extend/plugins/nextgen-public-uploader/

http://onswipe.com/setup
Version 2.1.5 | By Onswipe | Visit plugin site

Page Links To
Allows you to point WordPress pages or posts to a URL of your choosing, instead of its WordPress page or post URL. It also will redirect people who go to the old (or "normal") URL to the new one you've chosen (`301 Moved Permanently` redirects are standard, but you can choose a `302 Moved Temporarily` redirect if you wish). Good for setting up navigational links to non-WP sections of your site or to off-site resources.

Photonic Gallery for Flickr, Picasa, SmugMug, 500px, Zenfolio and Instagram [may be removed]
Extends the native `gallery` shortcode to support Flickr, Picasa, SmugMug, 500px, Zenfolio and Instagram. JS libraries like Fancybox, Colorbox and PrettyPhoto are supported. The plugin also helps convert a regular WP gallery into a slideshow. In case you happen to be using a theme or plugin that already overrides the `gallery`, Photonic provides you with the option to use your own shortcode for Photonic galleries. This lets your plugins coexist. Bear in mind that if you deactivate Photonic you will have to remove all instances of this custom shortcode, something that is not required if you stick to the `gallery` shortcode.
http://wordpress.org/extend/plugins/photonic/

Posts in Page [NEW]
Easily add one or more posts to any page using simple shortcodes. Supports categories, tags, custom post types, custom taxonomies, and more. This plugin just makes it easy for anyone to *pull* posts into other areas of the site without having to modify theme files.
http://wordpress.org/plugins/posts-in-page/
http://www.ivycat.com/wordpress/wordpress-plugins/posts-in-page/
Version 1.2.4 | By IvyCat Web Services | Visit plugin site

Profile Builder
Login, registration and edit profile shortcodes for the front-end. Also you can chose what fields should be displayed or add new (custom) ones both in the front-end and in the dashboard.
It lets you customize your website by adding a front-end menu for all your users, giving them a more flexible way to modify their user-information or register new users (front-end registration). Also, grants users with administrator rights to customize basic user fields or add custom ones. Create a new page and give it an intuitive name(i.e. Edit Profile). Now all you need to do is add the following shortcode(for the previous example): [wppb-edit-profile]. Publish the page and you are done!
You can use the following shortcodes:

- **[wppb-edit-profile]** - to grant users front-end access to their personal information (requires user to be logged in).
- **[wppb-login]** - to add a front-end log-in form.
- **[wppb-register]** - to add a front-end registration form.

IEEE WordPress Plugins and Widgets

Maintained by Ed Perkins; rev 1/28/2014 10:45 PM

- **[wppb-recover-password]** - to add a password recovery form.

Version 1.4.2 | By Marios Alexandrou | Visit plugin site

Semisecure Login Reimagined [pre-installed]
Please note that I've moved away from WordPress for the time being. I have no plans to continue updating my plugins. If someone was thinking of forking this project, now would be the time.
Semisecure Login Reimagined increases the security of the login process. This plugin uses a combination of public-key (RSA) and secret-key (MARC4, Rabbit, or AES) encryption to encrypt your password on the client-side before transmission. A nonce is used to help prevent replay attacks. This provides a "semisecure" login environment. For full security you should use an SSL certificate. This plugin is a "re-imagining" of the original Semisecure Login (which used one-way MD5 hashing). This version works with the new phpass hashed passwords that WordPress uses, as well as maintaining backwards compatibility with the older (pre WordPress 2.5) MD5 hashed passwords. See **Settings Semisecure Login** for options.

User Access Manager
Manage the access to your posts, pages, categories and files.
With the "User Access Manager"-plugin you can manage the access to your posts, pages and files. You only create a user group, put registered users to this and set up the rights for this group. From now on the post/page is only accessible and writable for the specified group. This plugin is useful if you need a member area or a private section at your blog or you want that other people can write at your blog but not everywhere.
http://wordpress.org/extend/plugins/user-access-manager/
http://www.gm-alex.de/projects/wordpress/plugins/user-access-manager/
Version 1.2.5.0 | By Alexander Schneider | Visit plugin site

User Locker [removed]
This plugin locks user account after given number of incorrect login attempts.
Default WordPress installation is vulnerable to brute force and dictionary attacks, because there is no limit how many times user can use invalid password before finding the correct one. This plugin closes this security hole by introducing maximum number of invalid login attempts. When someone exceeds this number, his/her account becomes locked, and can be unlocked only by requesting new password (using Lost Password option) or asking Admin for help (he/she can do it too). This makes brute force and dictionary attacks nearly impossible. See **Settings User Locker** for options.
http://wordpress.org/extend/plugins/user-locker/
Version 1.2 | By sirzooro |

Visitor Maps and Who's Online
Displays Visitor Maps with location pins, city, and country. Includes a Who's Online Sidebar to show how many users are online. Includes a Who's Online admin dashboard to view visitor details. The visitor details include: what page the visitor is on, IP address, host lookup, online time, city, state, country, geolocation maps and more. No API key needed. Settings | Donate

WordPress SEO by Yoast [update: now activate per site]
See SEO menu item in Admin Dashboard to configure.
The first true all-in-one SEO solution for WordPress, including on-page content analysis, XML sitemaps and much more. WordPress out of the box is already technically quite a good platform for SEO, this was true when I wrote my original WordPress SEO article in 2008 and it's still true today, but that doesn't mean you can't improve it further! This plugin is written from the ground up by WordPress SEO consultant and WordPress developer Joost de Valk to improve your site's SEO on *all* needed aspects. While this WordPress SEO plugin goes the extra mile to take care of all the technical optimization, more on that below, it first and foremost helps you write better content. WordPress SEO forces you to choose a focus keyword when you're writing your articles, and then makes sure you use that focus keyword everywhere.
Tutorial: http://yoast.com/articles/wordpress-seo/

Yet Another Related Posts Plugin (YARPP) [NEW]
Adds related posts to your site and in RSS feeds, based on a powerful, customizable algorithm.
YARPP Basic Standard Features
- Thumbnail or list view of related content.
- Related posts, pages, and custom post types.
- Templating: The YARPP templating system gives you advanced control of how your results are displayed.
- Advanced and versatile algorithm: Using a customizable algorithm considering post titles, content, tags, categories, and custom taxonomies, YARPP finds related content from across your site.
- Related posts in feeds: Display related posts in RSS feeds with custom display options.

Enabling YARPP Pro gives you access to even more powerful features. Find out more.
Searches database for related posts; uses cache to reduce performance impact. See YouTube tutorial at
