Event password: Entrepreneurship

Follow the instructions.

Speaker will be live.

You will be able to ask questions

Mute your microphone. Unmute only to ask questions.

<u>**Agenda**</u>: 6:30PM-8:00 PM Presentation

Bitcoin, Blockchain & Cryptocurrency in simple terms

Mr. Momin Quddus
IEEE, Senior Member

Abstract

Crypto currency and Bitcoin in particular have experienced significant interest among the public and the financial markets in last couple of years.

When it comes to crypto currency there is a significant information divide amongst the public. There are few people who have a deep understanding of the topic. They believe in this form of currency and are passionate about what it represents. Then there are rest of us who feel that it is cryptic topic as the name says.

In this lecture I will attempt to bridge the gap between these two communities. I will explain the origins of cryto currency and what it will mean to society in general in the near future. I will also present investment opportunities in Crypto currency.

<u>About the Speaker</u>

Momin Quddus is a senior member of IEEE. He is the current chair of IEEE Buenaventura Section. He has worked in Avionics, Wireless communication and Aerospace industries for over 30 years. He holds a patent on wireless antenna design.

Momin received BSEE degree from University of Texas and MSEE degree from Florida Atlantic University. He is a PE.

He is interested in analyzing topics in terms of economics and analytics.

He enjoys playing tennis, field hockey and soccer. He coaches youth sport teams. He volunteers at youth outreach events such as Science fair & Academic Decathlon. He serves in the advisory board of STEAM programs.
